

ANNUAL U.F.A. CONVENTION HELD AT STRATHMORE

A well attended meeting of the U F A of the Glenora Constituency was held in the Memorial Hall at Strathmore Wednesday afternoon.

Forty-one delegates were present representing 17 Localities these being U F W A Carlsland, Gleichen, Inglewood, Tisdale, Delamater, Strathmore and U F A from Carlsland, Delamater, Gleichen, Bielefeld, Strathmore, Tisdale, Inglewood, Strathmore and Ardmore.

President W J Smallick of Bielefeld presided. The meeting called to order, Pres Smallick asked the Secretary G C McInnes to read the minutes of last meeting which were adopted as read. The Treasurer's report was also adopted, following some discussion as to membership.

The addresses of the afternoon were given by Hon F S Grisdale, newly appointed Minister of Agriculture and Mr J C Buckley, M L A. Mr Grisdale delivered a very thoughtful, practical address, dealing primarily with the problem of the farmer and the government's attempt to better these.

Mr Grisdale referred at some length to the depleted treasury both of the government and the farmer. He stated that through a falling off in taxes the govt had just one third the money in 1933 it had in 1929 and thereby the Gov. did not make ends meet, which necessitated borrowing by the Dominion Gov. to aid the provinces. He stated that from 1929 to 1933 \$10 million dollars had been required for non employment relief. He stated the case of Imperial Oil which he said was a sample of many other corporations. In 1903 they had made a net profit of \$12,000,000 and in 1933 had lost seven million with their families out of employment.

Some time and in some way this condition will not be permitted. He advised a plan of unemployment insurance, but until that time the ordinary tax payer would pay too much.

He stated that the cycle of the last and the last year was a certainty and the fact that we have a good crop this year an assurance that it will be so two years hence. For this he recommended a scheme of crop insurance.

He reaffirmed the statement that the U F A Govt while a relief party, is an honest and efficient Govt, free of any selfish fund and the old line parties did not scruple to use.

He touched on the telephone system, which he said was a tremendous problem to face, but which the minister was handling in a very able and logical manner.

He referred to the repeated conferences of Premiers in Ottawa, and that attendance at the very status practically a command from the Prime Minister, as failure to attend.

Long tables were also arranged at which a delicious dinner was served to a large number. Clock golf, croquet and horse shoe pitching were provided while others enjoyed a stroll through the grounds. Vegetables at their best, older berry bushes, plum trees, and the sunnys which looked back to the old Ontario home. A genuine oak tree saw another in the garden of Mr. E. Whitteacre recently a blue pine from Holland and a real ribbon cedar all added their quota of interest.

Poison Hoppers by Plane

Spreading of poison for grasshoppers has been so successful in one or two areas in Southern Alberta that it will probably be adopted as a regular method in future. The planes were used in Drumheller and Hussar districts, flying at 100 feet elevation, using four pounds of bait to the acre. The cost per section was \$8.00 to \$10 and the distribution timely and even by done, and so effective with the use of oil bait, that hoppers were dying a week after the bait was spread. The use of oil is a new departure this year that was developed by the provincial department of agriculture to take the place of water, thus preventing the bait from drying out and becoming ineffective in a short time after spreading.

COWARDLY FINANCE

Ten men who were financiers chip-
ped in ten dollars each and bought a
fine cow that gave ten gallons of
milk every day. The milk was divid-
ed at night and each man received 1
gallon as his share. Soon the neigh-
bors far and near heard about the
wonderful cow and said to one another,
"Think of getting a whole gallon of
milk every day—what a wonderful
return on a ten dollar investment. I
wish I had a share in her."

When this talk was repeated to the
ten men they held a meeting and one
of them said, "Let us give these peo-
ple what they want. Our share in the
cow cost us ten dollars each and we
can sell other shares at the same
price. So they went to a printer and
obtained a thousand sheets of paper
bearing the legend, "One share in the
cow. They then sold five hundred of
these shares at ten dollars each,
which brought them five thousand
dollars, and divided the other five
hundred among themselves as their
reward for being smart. Each man of
the ten now had fiftyone shares
whereas in the beginning each had
but one. One of the ten began to
worry. "Look here," he said, "Every
fellow who bought a share in this cow
will expect a gallon of milk tonight
and the cow only gives ten gallons.
When the milk is divided into one
thousand and ten parts these new
shareholders won't get a spoonful.
Shares will drop to nothing. We'd bet-
ter unload while we can." So the ten
men went out on the street to find in-
vestors, and each of them said the
that had been awarded to him, and
thus they obtained a second five
thousand dollars to divide among
themselves. But now eight was driving
near, and again one of the ten began
to worry. "There will be a row at milking
time," he said. "Hasten about and
persuade each of the shareholders to
sign a proxy, which is a joker authoriz-
ing you to cast as you think best the
vote to which his share entitles him."
Then return with proxies, and we
shall do some voting.

At twilight the men at the barn,
and in their hands were one thousand
signed proxies to represent the ab-
sent shareholders and the ten were
entitled to vote in their own right
for each still held his original share.
Now, said the one who did the talking,
we must reorganize. This company
needs a president, a treasurer and
vice presidents. That gives each of
us a job. And since there are ten of
us and the cow gives ten gallons it is
moved and accounted that each of us
receives a salary of one gallon of
milk per day. All in favor say Aye.
The motion carried without a dissent-
ing vote. And then they milked the
cow. (The Royal Bank Magazine).
